A lion was once sleeping in the jungle when a mouse started running upon and down his back just for fun. This disturbed the lion's sleep, and so he woke up quite angry. He was about to eat the mouse when the mouse desperately requested the lion to set him free. "I promise you, one day I will be of great help to you someday if you save me." The lion laughed at the mouse's confidence and let him go. One day, a few hunters came into the forest and they took the lion with them. They tied him up against a tree. The lion was struggling to get out and started.

Ability of an organisation to prosper arises for its competitive advantage over the other organisation operating its market sector.

The ability of the organisation to be survive requires that its competitive position is not significantly less than to the other firms operating the market sector. Cost leadership is simple to be able to sell the goods or provide the it service at a price that is lower than to that of the competing products even by though the competition may have a some lower price. Information and communication technologies can have a considerable part to play in competitive strategy. ability.
